

Andrew Strigaliyov, Senior Fullstack Developer

Warsaw, Poland · +48 516 395 191 · strigaliyov4working@gmail.com

PROFILE

Senior Fullstack Developer with 6+ years building production web applications across FinTech, e-commerce, travel, and SaaS. Core strength in React, Node.js, and TypeScript, with hands-on depth in cloud infrastructure / DevOps (containerized and self-hosted deployments, CI/CD) and AI engineering (LLM integration, autonomous agents, AI-driven workflows). Comfortable owning the full lifecycle — from frontend architecture and release delivery to backend services and infrastructure.

Domains: FinTech, AI / LLM Applications, E-commerce, Travel, Personalization, SaaS, DevOps & Infrastructure, API Integrations, Product-Led Growth

EMPLOYMENT HISTORY

Senior Frontend Engineer

Sep 2025 — Present

Mastercard, Warsaw · Remote

- Architected the frontend foundation for net-new application features — component structure, state management, and module boundaries — establishing patterns the wider team built on.
- Built AI / LLM-powered frontend workflows end-to-end, owning the integration, state, and UX layers for AI-driven product features.
- Took de facto ownership of release management: coordinating feature readiness, QA cycles, and incremental rollout across the team.
- Owned the internationalization layer end-to-end (react-i18next), enabling multi-market rollout, and designed a feature-flag system that decoupled deploys from releases.
- Drove frontend performance optimization and led dependency security remediation in a financial-grade product.

Senior Frontend Developer

Apr 2023 — Aug 2025

EasyJet, Warsaw · Remote

- Started on a feature team building customer-facing monetization components — promotional placements, upsell flows, and dynamic content to improve conversion.
- Moved to the Personalization team and led frontend development of adaptive user experiences, tailoring content to user behavior, segmentation, travel preferences, and budget range.
- Partnered closely with analysts and UX to shape targeting strategies and user journeys across high-traffic areas of the site.
- Built flexible React components, integrated personalization APIs and Node.js SDKs, and ensured the frontend responded to real-time segmentation signals; contributed to mentoring and code reviews.

Software Engineer

Sep 2019 — Apr 2023

Vention, Minsk / Warsaw

- Worked across long-term Web, WebRTC, and Web3 projects, taking on increasing ownership and mentoring responsibilities.
- Built WebRTC features for a real-time multilingual interpretation platform and integrated Google Calendar, Slack, and Microsoft Teams.
- Core contributor at Absolute Labs (Web3 marketing): built smart-contract tooling, processed Ethereum / Polygon data, and implemented a segmentation system filtering 600M+ wallet addresses.
- Delivered a full educational platform end-to-end in a small team (3 devs + 1 QA), from backend APIs to CI/CD and deployment.
- Mentored two Trainee Lab interns (both promoted to Junior Developer) and contributed to the lab's structured learning roadmap.

EDUCATION

Sep 2016 — Jun 2020

Bachelor of Computer Science (BCompSc), Belarusian State University, Minsk

SKILLS

Languages:	JavaScript, TypeScript
Frontend:	React.js, Next.js, Redux, MobX, HTML, CSS, SCSS, Tailwind CSS
Backend:	Node.js (Express, NestJS, Fastify)
Databases:	PostgreSQL, MongoDB, Redis
ORM/ODM:	Prisma, TypeORM, Sequelize, Mongoose
API:	REST, GraphQL, WebSocket (Socket.io)
Cloud:	AWS (EC2, S3, Lambda, RDS, CloudWatch)
DevOps:	Docker, GitHub Actions, Coolify, Hetzner VPS, n8n, Nginx, CI/CD, self-hosted deployments
AI Engineering:	LLM integration (Claude, OpenAI), AI agents, Model Context Protocol (MCP), prompt engineering, RAG, Claude Code, n8n AI workflows
Architecture:	DDD, Modular Monolith, Microservices
Testing:	Jest, Supertest, Unit, E2E

LANGUAGES

English (C1), Russian (Native speaker), Belarusian (Native speaker)
